INDIA: UTTAR PRADESH SODIC LANDS RECLAMATION III PROJECT

TERMS OF REFERENCE (SODIC) FOR SELECTION OF NEW SUPPORT ORGANISATIONS FOR PROVIDING MOTIVATOR (LIVESTOCK DEVELOPMENT)

1. BACKGROUND

1.1 Uttar Pradesh Bhumi Sudhar Nigam had successfully completed UPSLR-I and II Project and implementing UPSLR-III-Project in 29 districts of the state are Lucknow(Barabanki), Hardoi(Sitapur), Sultanpur(Ambedkarnagar), Raebareli(Amethi) Mainpuri(Firozabad), Etawah(Auraiya), Allahabad(Kaushambi), Etah(Kasganj), Aligarh (Bulandshahar), Unnao, Azamgarh, Santravidas Nagar (Varanasi), Jaunpur, Kannauj, Kanpur Nagar, Kanpur Dehat, Fatehpur, Pratapgarh, Farrukhabad & Ghazipur.

The development objective of the project is to increase agricultural productivity in selected areas of degraded lands in UP. The objective will be achieved through reversal of water-induced land degradation, enhancement of soil fertility and improved provision of agricultural support services. It aims to suitably reverse the process of land degradation and fertility loss, thus enhancing agricultural productivity. By focusing on the reclamation of land for the poorest section of farmers, the project is expected to contribute significantly to poverty alleviation and improved food/nutrition security in the project areas. It is expected to have favorable impacts on the income of farmers and improve the profitability of farm production by enhancing local-level capacities for production as per the market demand and provide post-production support for value-adding activities to enable producers to access non-traditional markets. The project is also endeavouring towards closing the “productivity gap” in agriculture in the state by improving extension to promote new agricultural technologies and agronomic practices.

1.2 The project includes a number of activities which would have favourable impact on agriculture and socio-economic aspects of the districts falling under the project at the individual project activity level. There is a need to anticipate various paradigms of the project outputs/outcomes and develop possible support mechanism to achieve the broader objectives. It is in this context that, as part of the project implementation, it is planned to hire the services of dedicated SOs for providing all sorts of support to the farmers in carrying out project activities and empowering the community to sustain the project outcome after the project period.

In this regard, detail Terms of Reference (ToR) has been prepared to help the interested consultants/SOs to understand the scope of work and expected output.

2. PROJECT COMPONENTS

The project has the following five components:

2.1 On-Farm Development and Land Treatment: This component is the core of the project, accounting for more than half of the project costs. The objective of this component is to sustainably reverse water-induced land degradation (salinization, sodification and water-logging) in the targeted areas. Activities financed under this component would include: (a) detailed mapping and classification of sodic lands to facilitate adoption of appropriate management techniques to develop sodic lands; (b) formation of water user groups (WUGs); (c) clarifying and confirming land titles and tenure arrangements; (d) on-farm development through land-leveling, bunding and improved drainage network (connecting field drains to link drains and main drains); (e) provision of shallow tube wells to help in reclamation operations and provide irrigation; and (f) application of chemical/organic amendments and plant nutrients to the soil to boost productivity.

The intervention model being followed under this component has been developed and validated in the earlier phases of Sodic Lands Reclamation Project. The expected results from this component, in the reclaimed areas, are: (i) improved soil quality; (ii) increased productivity; and (iii) higher cropping intensity.

2.1(a) Ravine Land Reclamation as a Pilot: Ravine reclamation pilot which is part of the Sodic Land Reclamation-III Project was also launched in the year 2009 with a aim to reclaim and manage ravine land on watershed basis focusing on in situ moisture conservation, water harvesting, reducing soil erosion, improving natural vegetable and enhancing crop and livestock productivity. Four cohorts of ravine pilot have successfully completed.

2.2 Improvement of Drainage Systems: The objective of this component is to improve and better maintain drainage networks in the project area which will help to remove leach effluents, excess rain and irrigation water from reclaimed and adjoining areas. The activities being financed under this component include (a) re-modeling and rehabilitation of main drains; (b) maintenance of main drains; and (c) training and capacity building of Irrigation Department (ID) staff and WUGs for appropriate O&M of drainage works.

The rehabilitation of main drains are being undertaken by ID through participatory processes that involve stakeholder consultation in planning, design and execution of the physical works. The maintenance of rehabilitated main drains is being done by the ID and that of link drains and field drains by relevant WUGs. The expected results from this component are: (i) length of main drains rehabilitated and maintained; (ii) increased drainage capacity of main drains; (iii) land area relieved from water-logging; and (iv) increased productivity.

2.3 Agricultural Support Services: The objective of this component is to enhance farm livelihoods by increasing productivity of agriculture and related activities through improved production technology and agronomic practices and more efficient and effective delivery of key support services. The activities financed under this component include: (a) training of farmers in effective land and water management practices, including efficient water use, drainage, and crop planning; (b) upgrading agricultural technology and production practices (for agriculture and livestock) through field-level demonstrations; (c) exposure visits, rural fairs, animal health camps and other “means” for rural communication and outreach; and (d) training and capacity building of line department staff and other relevant providers of support services to farmers. The expected results from this component are: (i) increased productivity; (ii) greater cropping intensity; and (iii) crop diversification.

2.4 Institutional Strengthening for Improved Market Access: The objective of this component is to improve the profitability of farm production by enhancing local-level capacities to align production with market demand, enable producers to access finance and other critical inputs, and provide post-production support for value-added activities. Activities being financed under this component include: (a) strengthening of WUGs, Women self-help groups and other producer groups; (b) facilitating linkages that improve farmer access to finance and other critical inputs; (c) developing greater access to (non-traditional) markets; and (d) promoting post-harvest value-addition, as appropriate. The expected results from this component are: (i) increased share of produce marketed; (ii) improved price terms for farmers; and (iii) increased access to non-traditional markets by establishing sodic haats.

2.5 Project Management

The objective of this component is to ensure smooth implementation of project activities, monitoring of project implementation progress and outputs/outcomes achieved, and learning

from project experience. Activities financed include: (i) setting up and supporting project management units at the state and district levels; (ii) project M&E and learning activities, including assessment of environmental impacts, SOs and sustainability of land reclamation; (iii) services of an external M&E agency to be engaged as consultants for the duration of the project; (iv) liaising with project partner organizations, support organizations, external professional agencies and the World Bank; and (v) documentation of project experience and its dissemination to the wider development community.

At the state level, the main implementing agencies are Uttar Pradesh Bhumi Sudhar Nigam (UPBSN) and the departments of Agriculture, Animal husbandry, Panchayati Raj and Irrigation, Remote sensing application centre. At the local level, project planning/ coordination committees will be established at village panchayat, block and district levels, with a convergence plan developed to help these committees interact better with existing public institutions as well as government development programs at these levels.

3. OBJECTIVES FOR HIRING NON-GOVERNMENT ORGANISATION AS SUPPORT ORGANISATION

- The objective of hiring SO is to strengthen farmer's group related to livestock activities in participatory manner and nurture the community institutions for establishing group based livestock management system as well as interaction with Animal Husbandry Department to evolve an effective extension and service delivery system, reporting system for emerging animal health issues and livestock product safety.
- SOs should facilitate in assisting the Animal Husbandry Department in streamlining the extension system for educating the project beneficiaries on quality livestock rearing to get remunerative price of livestock produce.
- To provide regular training sessions of project beneficiaries to acquaint them on planning and implementation of livestock activities at the village level and in this process they will work with community institutions including the SIC, SHG and other community institutions involved in the project implementation.
- To facilitate the community level decision making process by imparting training and educating community on livestock technical and developmental issues and act as a bridge between the community and the project for hand holding and technical backstopping.
- To build the capacity of farmers on livelihood through livestock development and strengthening the knowledge base of community about various agricultural and livestock improvement related technologies.
- Induction of required skills and enhancement of existing skills of the project participants and other stakeholders, e.g. PRIs.
- To educate project beneficiaries about their entitlements/rights, roles and responsibilities related to livestock development.
- To ensure that distribution of various inputs of livestock development activities is disclosed and made with transparency as per work plan to ensure that it is reaching to project beneficiaries along with assessment of adoption of various demonstration under livestock activities at village level, documenting the level of adoption and constraints in adoption.

- To measure the result and impact of livestock intervention i.e, breed improvement in small ruminant, large domestic milch animals, milk production.
- To identify weak area for streamlining the awareness creation program to develop market linkages for milk and other livestock products.
- To review distribution of funds allocated to WSHG's members timely.
- Participation in Animal Health Camp, Organising of farmer's meet, co-ordination with male and female motivators of the project, participation in meetings of SIC and WSHGs, Core Team as per schedule chalked out based on project activities.
- To assess the training needs of UPBSN project staff, SO Staff and beneficiaries and to impart necessary training to all for carrying out agriculture and allied activities successfully.
- The SO will have to work according to the Community Operation Manual (COM) of the project.

4. ROLE OF SUPPORT ORGANISATION IN THE PROJECT

- The Support Organization under the UPSLR-III project would have to work on community mobilization and making community aware about the various steps and different activities of the project related to livestock development. Providing regular training sessions of project beneficiaries to acquaint them on planning and implementation of livestock activities at the village level and in this process they will work with community institutions including the SIC, SHG and other community institutions involved in the project implementation which include motivation and awareness generation campaigns are to be carried out in the selected project villages by the SO for technology dissemination. Livestock Development technology would be disseminated by the SO in the area of livestock development including fodder development including fodder crop pattern, changes in package of practices, extension and market linkages etc. Selected SOs would play catalytic role in formation of Beneficiaries' Institution like Site Implementation Committee (SIC), Core Team (CT), Women Self Help Groups (WSHG) and Producer's Group (PG) and Producer's Organisations (PO). The SOs would work for establishing linkages of beneficiaries with local banks for accessing credit for livestock and agriculture related development for income generation activities. The SO will strengthen farmer's group related to livestock activities in participatory manner and nurture the community institutions for establishing group based livestock management system as well as interaction with Animal Husbandry Department to evolve an effective extension and service delivery system, reporting system for emerging animal health issues and livestock product safety. SO would also work on social issues for improvements in livelihood, reduction in migration, motivation for access to health and education through Women Self Help Groups. It would also work on agricultural support services for production of quality produce and developing the institutions like Producer's Group (PG) and Producer's Organisations (PO) for carrying out marketing of such produce.

5. RESPONSIBILITIES AND TASKS TO BE CARRIED OUT BY THE SUPPORT ORGANISATION

The UPSLR-III project emphasizes a participatory management approach in the implementation to enhance project outreach and ensure better participation of the community. SOs will play key role in securing participation of livestock rearing

community in the project along with the UPBSN. As per the project framework, they have to work with the beneficiaries throughout project cycle. Under the project, the SOs would work for awareness generation, mobilization of the community, formation of community based purposive groups, their nurturing and sustenance and ensuring that a sensitive disposition and participatory processes pervades in carrying out all the activities of the project. Apart from that, the emphasis would be on involvement of Line Departments, Research Institutions, Panchyati Raj Institutions and establishment of community based extension model. The SOs will have to shoulder the responsibilities for establishing such model under the project. Their responsibilities will mainly include:

The contribution made by SO staff is recorded in monthly and quarterly progress report. The report sent by CVO will be examined/reviewed vis a vis report submitted by MIS division by respective Project Manager so as to have true assessment of the progress of project activities by Management.

8. **CONTRACT PERIOD**

UPBSN will enter into contract with newly selected support organization up to 29 Dec. 2017 from date of contract.

9. **PERFORMANCE APPRAISAL OF SUPPORT ORGANIZATION STAFF AND SUPPORT ORGANIZATION**

The overall performance of Support Organization will be evaluated on the basis of assessment of their work by respective Chief Veterinary Officer, Zonal Officer and Project Manager of district and Participatory Management Cell of UPBSN on quarterly basis on prescribed preformae. Further, the performance of individual SO staff will also be evaluated on various performance indicators attached with each position on monthly basis.

Regular evaluation of work of each SO staff deployed in the district will be done by Support Organization as well as Chief Veterinary Officer and Project Manager separately on quarterly basis on the scale of 100 points/marks related with various performance indicators attached. **The parameters of performance rating will be finalized internally by Department of Animal Husbandry headed by an officer not below the rank of Joint Managing Director. The said committee will be constituted by and after approval from Director, Animal Husbandry, UP.** On the basis of evaluation, if any staff is found under-performing means securing less than 60% marks, then reasons for short-fall in performance will be identified. If it is due to lack of knowledge of various activities of reclamation, then specified job based training would be organized in systematic manner to enhance the capacities and knowledge of SO Staff. Necessary counseling of that staff will also be done by Support Organization. The performance of that particular staff will further be reviewed/watched up to three months after completion of capacity building period of that staff. If one is still found under-performing, then suitable advice will be given specifying lacking areas for improvement and 5% of fixed honorarium amount per month may be withheld or may not be paid to him for the period of three months or till the month when improvement in working is reported, whichever is earlier. And if that particular staff does not show desired improvement in working even after the period when deduction from honorarium was executed, **then Support Organization will replace that particular staff with the consent of Nodal Officer, AH under the supervision of Head of above said Committee.** During the said period, when deduction from honorarium of particular SO staff is executed, Support Organization will have to own liability and amount equivalent to 2.5% of the fixed honorarium of that particular staff may also be deducted per month from the amount of supervision charges to be paid to Support Organization. Further, while evaluating overall performance of Support Organization, which will be done on the basis of assessment of their work on 100 point/marks scale each by respective Chief Veterinary Officer of the district on quarterly basis. If any Support Organization obtains less than 40% marks and rated unsatisfactory in working, then suitable advice would be issued to Support Organization specifying lacking areas for improvement and two month time will be given for showing improvement in working/rating. If this particular Support Organization does not show improvement even after 02 months scanning period, then amount equivalent to 5% of the total supervision charge per month will be deducted for the period of two months

or until the month when improvement in working is reported whichever is less, whichever is earlier. In addition, if Support Organization does not exhibit improvement in working in above said two months period when 5% deduction was made, then 10% of the total supervision charges will be deducted for further period of three months from the supervision charge to be paid to the Support Organization. Further, if said Support Organization does not show desired improvement in performance and bad performance continues even after 06 month period when deduction from supervision charges was executed, then UPBSN may terminate the contract with respective Support Organization, for that SO will be fully responsible.
